

COMPANY PRESENTATION 2024

About us / service offering / facts

BEHÄLTER KG BREMEN

Excellence in STAINLESS STEEL since 1965

1965

heute

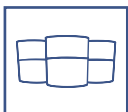

Experience: more than 50 years

Since **our foundation** in 1965, we have continuously been striving to be the supplier of choice for **stainless steel tanks both „second hand“** as well as **made-to-measure**.

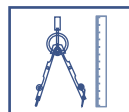

Central warehouse: Bremen

On **over 15.000 sqm storage & warehouse area**, we centrally store most of our equipment at our headquarter in Bremen. We invite our customers to visit us anytime!

Inventory: >1.500 tanks on stock

With over 1.500 pressure, storage and mixing tanks, we have a uniquely vast stock available for our clients. We are reknown for **instant availability**, great focus on **customer care** and **quality „made in Germany“**.

Made to measure: short delivery times

Customer-centric made-to-measure tank projects **up to 100.000liter** volume can be realized in as little as **8 weeks production time**, including the design and construction of agitators, if needed.

Condition: second hand and new

Our offering includes both „second-hand“ and brand new tanks & vessels. This allows us to offer our clients a **broad range of products, instantly availability**, at an **attractive value for money price point**.

Customer care: our priority

With an average of **>10 years of company affiliation**, each and everyone in our team is an expert in its field and ready to assist you in the planning & realization of your projects. In order to preserve our extensive experience, we have been certified in 2015 according to the **Fraunhofer-method „knowledge balance“**.

LARGE INVENTORY

Unique inventory: >1.500 stainless steel tanks immediately available

Overview of our stock

Apart from **our decade-long experience in manufacturing tanks** according to customer requirements, we also **store in Bremen on over 15.000 sqm a large selection of used and new tanks and agitators**. These are directly available from stock and at an **excellent value for money proposition**.

Every second hand tank is carefully inspected by us once it reaches our warehouse. The material analysis via our **mobile x-ray spectrometer** as well as the **wall thickness measurements with ultrasound** are important purchase decision parameters for our clients. We also offer **copies** of the original documentation **up to DIN A0**, where available.

In our stock we keep tanks & vessels in **used condition from 10 to 100.000 liter**. This is complemented by a variety of **new tanks & vessels from 300-30.000 liter**, which are also always readily available.

Although most information are accessible online, we kindly invite all our clients to arrange a **visit in Bremen** to inspect our products and convince yourself of their quality.

Procedure for a sale from stock

1 You contact us

via E-Mail: mail@behaelter-kg.de or telephone: **0049 421 34 85 10**

2 You will receive a detailed offer

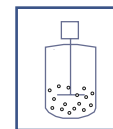

Within 24 hours we will send you an **offer via E-Mail**. We will also be pleased to provide you with the copies of documentation, further pictures or **transport charges in advance**.

3 We will process your order

Once all open issues have been resolved and the order is confirmed, our tanks will be ready for despatch upon 24 hours.

✓ new and used tanks

✓ mixing tanks

✓ heat/coolable tanks

✓ process-/pressure tanks

- mobile X-ray spectrometer
- endoscope-camera

We deliver from stock

- > 1.500 used tanks on stock
- brand new tanks from 500 to 30.000 liter
- pressure-/storage-/mixing tanks
- heatable- /coolable tanks
- process- / pressure vessels

MADE-TO-MEASURE

Short delivery times and attractive pricing

50 Years experience in construction of tanks

Our service offering starts with a **detailed product consultation** – let us **solve your problem together!** As every project is unique, we will need 1-5 working days to provide you with a customized offer.

After further technical clarification and your order confirmation, we take care of your project holistically - we try to **provide you with all complementary services!** Hence we can help you with assembly services or static calculations. After **approval of the technical drawing**, we directly start with the production of your tank - once finished, you are invited to visit us for an **acceptance audit**.

Of course we can take care of the delivery to your production site, also via special transport or boat. In parallel you receive the technical documentation and certificates, only thereafter our joint project ends.

Let us be your **all-in-one service provider** - so that you can focus on all other business procedures.

Typical procedure of a customized project

1 You contact us

via E-Mail: mail@behaelter-kg.de or telephone: **0049 421 34 85 10**

2 You will receive a detailed offer

Within 24 hours we will contact you for further details. If helpful, we provide you with a **detailed product consultation**. Within **max 5 working days** we will have your **customized offer** ready for you.

3 We will process your order

When the order has been received we create the technical design describing all the relevant elements. If this drawing is accepted and a binding contract agreed upon, we start manufacturing the ordered model of your tank.

4 We deliver all of our products free of charge

Typically already **within 8 weeks** after order receipt, your tanks are ready for delivery, Europe-wide.

Brand-new tanks in stainless & mild steel

- Short delivery time: starting from 8 weeks
- 70+ customized projects per year
- More than 50 years' experience in tank construction
- All-in-one: we offer incl. agitation, electronic components and platforms
- Proven partner of end users and engineering providers across all industries
- Competitive in pricing & quality
- Trade-in of your used surplus equipment
- We can offer construction according to WHG, AD2000, ATEX, EN1090 & EN 13445

PURCHASE OF SURPLUS

We buy used tanks, production facilities and plants

Experts in second-hand surplus acquisition

Disposal

Are you a seller of **used stainless steel tanks** or a complete production facility? We would be pleased to hear from you!

Purchase spectrum

- Single tanks & complete plants
- Sector: chemistry, pharmacy & food
- **Stainless steel** only, in exceptional cases also **standard steel** and **enamel**

Handling

- Sale significantly above the scrap value
- Second usage in the best interest of our environment
- Payment 100% prior to pick-up

Typical procedures of a tank purchase

1 You contact us

via E-Mail: mail@behaelter-kg.de or telephone: **0049 421 34 85 10**. Please provide us with as much information as available (name plate, internal and external optical condition, technical documentation and last operational usage).

2 We give you a first feedback

Within 24 hours we will contact you for further details.

3 You will receive a detailed offer

When all questions have been answered, we will provide you with an . For large projects we typically try to visit your site on short notice upfront.

References 2018 – 2024:

- purchase of an ex-proof pharmaceutical API production site with > 200 tanks & equipment pieces
- dismantling and sale of a complete bioethanol plant with 1.5 million liter tank volume
- complete sale & disassembly of a distillation plant for 100.000 m³ / year (new built price €33 mm)
- purchase of colour & coatings manufacturing site with 40 agitator vessels
- purchase of 60 stainless steel tanks of an ice cream factory

EMPLOYEES

Reliable thanks to long-standing company affiliation

Everything revolves around you:

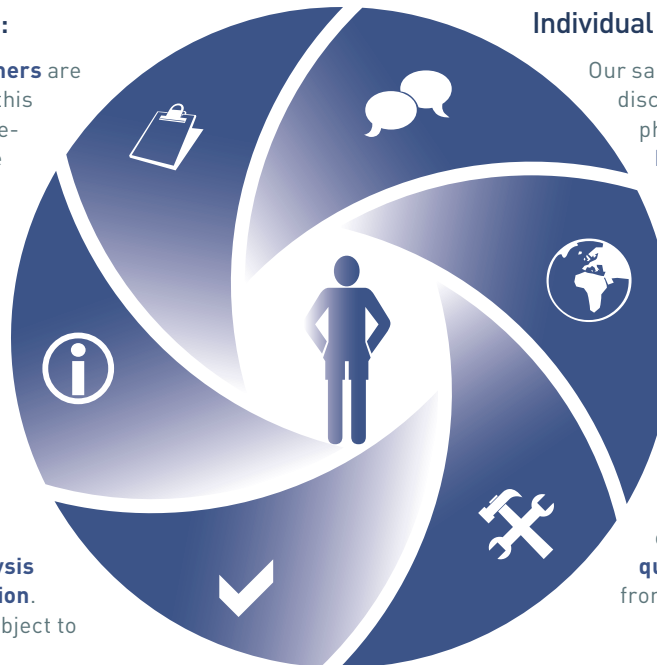

Longterm partnerships with our customers are the most important - we are in line with this principle **since 50 years**. The projects therefore treated with the greatest care. We offer you any type of support needed, in order to ensure that the entire project runs smoothly until the very end.

Services

We will offer you many additional services and particularly attractive **large-scale transportation, installation on site or calculation of static details**. Please feel free to contact us!

Quality assurance

Used tanks are verified by **detailed analysis of materials and wall thickness inspection**. Before delivery, also all our tanks are subject to strict quality control.

Individual consultation, requirement analysis

Our sales team is available for you daily, to discuss your tank & agitator project. Via telephone or **via personal visit in Bremen at your site**.

Delivery schedule

Your project is very urgent? Our used tanks from stock can be **despatched within 24 hours**. New tanks can be realized in as little as 8 weeks.

Construction

New tanks are carefully planned by the help of **modern software tools**, in order to be compliant with applicable regulations. That way, we can guarantee that our **quality standards are continuously met**, from the idea to the realisation.

100% RELIABLE

- reliable partner in the tank and vessel industry though technical-know-how and experience
- long-term oriented, though a generation shift in 2017
- dynamic workflows, though short administrative procedures and flat hierarchies
- quality-conscious due to a well-rehearsed team and over 50 years of company history

Tanks & agitators
